Study, meet, share for equal uniqueness
sms 4 EU

Program

sms 4 EU
Workshop 2

The project sms 4 EU enables teachers and learners from partners' countries to exchange experiences how to bring disadvantaged people (mainly with a lower level of education) into the world of education and how to motivate them to learn and to be active. Partners will organise workshops with their learners during the transnational meetings and will present the specific methods how to support and maintain the interest and motivation of learners with various kinds of social problems to go on in learning and how to develop in them the feeling of the responsibility not only for themselves but also for the whole group of learners. The materials in the form of presentations, best practice examples, records and photos from the workshops will be collected and put on a CD-ROM that will be disseminated. Just the structure of the partnership promises to achieve interesting and useful outcomes. The website will inform about the results and about the activities undertaken during transnational workshops

FOCUS OF THE WORKSHOP

DISADVANTAGED PEOPLE FROM RURAL AREAS

Date

12th – 14th July 2008

Organiser
